Summary

Greetings!

I've been into computers and tech for as long as I can remember. What started with drawing shapes in Logo when I was ten turned into a real passion during the pandemic when I stumbled upon FreeCodeCamp. That's when I began seriously learning web development — and I haven't looked back since.

Since then, I've had the opportunity to work across web and mobile platforms, building everything from e-commerce sites and dashboards to full-scale mobile apps. With 3 years of work experience and a strong academic background (currently pursuing my BSc degree at BITS Pilani), I've also led a UI team, worked closely with clients, and handled everything from front-end architecture to performance optimization.

I enjoy turning designs into clean, responsive, user-friendly interfaces. I care about the little details — not just how things look, but how they feel to the user. Whether I'm building reusable components, integrating analytics, or just making sure everything works perfectly across screen sizes, I aim for quality.

Outside of coding, I'm naturally curious, always reading or exploring something new. Feel free to reach out if you'd like to chat about tech, books or anything. Always happy to connect!

Here's my Tech Stack:

Frontend Development:

- HTML | CSS | JavaScript | TypeScript

- Next.js | React.js | Redux | styled-components | Bootstrap | Tailwind

CSS

- JSP

Mobile Development:

- React Native

Backend Development:

- Node.js | Express.js | Hono
- MongoDB | Mongoose | PostgreSQL | Prisma
- Java

Tools & Technologies:

- Git | GitHub | Bitbucket | Docker

UI/UX Design:

- Figma | Canvas
- WebFlow | WordPress | Framer

Analytics & SEO:

- Google Analytics | Google Tag Manager
- SEO Best Practices | Web Accessibility Guidelines

Experience

CreativeScript

Frontend Developer

March 2024 - Present (1 year 2 months)

Noida, Uttar Pradesh, India

- Developed and maintained frontend applications for both web and mobile platforms, using Next.js, Redux for web and React Native for cross-platform mobile apps.
- Translated Figma designs into fully responsive, pixel-perfect UIs for dashboards, customer relationship management (CRM) systems, websites, and mobile applications — ensuring consistency across screen sizes and platforms.
- Built reusable UI components and managed state using Redux, enhancing code efficiency and scalability.
- Collaborated closely with designers and backend developers to align UI behavior with business logic and ensure smooth integration.
- Maintained clean, well-structured code and used Git for version control in a collaborative development environment.

Digital Technologies Private Limited

UI Developer

September 2023 - Present (1 year 8 months)

I have been instrumental in creating and optimizing user interfaces for e-commerce websites and mobile applications. My multifaceted role spans frontend and mobile development, team leadership, performance optimization, testing, and client interaction.

1. Frontend Development:

- Solely developed and maintained the front end of e-commerce platforms using JSP, JavaScript, jQuery, HTML, CSS, and Bootstrap.
- Designed visually appealing, user-friendly interfaces to enhance customer experience.
- Created responsive email templates that boosted user engagement.

2. Mobile App Development

- Automated CI/CD pipelines for seamless build and deployment.
- Fastlane setup for efficient app distribution and testing.
- Dockerized environments for consistent development and deployment.
- Firebase Analytics and Crashlytics integration for monitoring user behavior and app stability.

3. UI Team Lead:

- Led the UI team, managing the entire UI process to ensure high-quality deliverables.
- Coordinated with cross-functional teams to align UI development with business goals.
- Created and managed Jira tickets to track project progress, ensuring timely delivery of features and fixes.

4. Performance Optimization & SEO:

- Improved website performance and search engine rankings through SEO best practices.
- Integrated Google Analytics for traffic monitoring and analysis.

5. Comprehensive Testing:

- Conducted functionality, usability, compatibility, cross-browser, responsive, accessibility, regression, and integration testing to ensure a seamless user experience.

Self Employed
Frontend Developer
January 2023 - Present (2 years 4 months)
India

CreativeScript
Frontend Developer
May 2022 - November 2022 (7 months)

Implemented best industry practices to develop an e-commerce website's front-end using JSP, JS, and LESS. Converted Figma designs to code.
